PREVIEW!

○ Outcome Tool Changes (*Sneak Peek*)

- KY20 changes will be announced soon (*targeting no later than 12/10*)

  o Focus will be on *replacement of Ohio Scales* (adult and youth-parent)... Internal workgroup recommendation is to transition to OQ Measures

  - **Y-OQ 30.2** measures total distress, somatic distress, social isolation, conduct problems, aggression, hyperactivity/distractibility, depression/anxiety, and flags critical items for immediate attention for youth consumers (*ages 4-17*)

  - **OQ 45.2** measures symptom distress, interpersonal relationships, social role distress/dissatisfaction, and flags critical items for immediate attention for adult consumers (*ages 18+*)
