ADAMH Public School Investments:

Research shows that 1 in 5 youth have a diagnosable mental health disorder. Only 20% of those receive treatment. We also know that 50% of lifetime mental health disorders start by age 14. Early identification and intervention is essential for positive outcomes.

The Alcohol, Drug and Mental Health Board of Franklin County has partnered with all of the public school districts in Franklin County to provide prevention, early intervention and treatment services to students by providing funding for certified mental health and addiction providers to be available for support in each district.

Nationwide Children's Hospital provides the Canal Winchester School district with Behavioral Health services to address school climate, prevention and treatment needs. School-wide prevention programs are designed to promote a positive school climate. For those students experiencing non-academic barriers to school functioning, targeted strategies and prevention programs are offered. Individual, family and group therapy is also offered to students exhibiting significant behavior or mental health issues that prevent them from being successful in school. The goal of the Canal Winchester Schools and Nationwide Children's partnership is to increase emotional and socialization skills and to remove/minimize behavioral health related non-academic barriers to school success. Through this partnership, ADAMH aims to reduce the incidents of mental health disorders and the onset of substance use in youth.

About ADAMH

ADAMH is Franklin County's authority for planning, funding and evaluating mental health, alcohol and drug use prevention and treatment services. ADAMH-funded services are provided by a local network of more than 30 not-for-profit providers.
